a look at
**Dietary Quality in
Long-Term Care**

NO ONE GOES THROUGH MEDICAL SCHOOL TO PRACTICE INSURANCE.

Remember graduating from college and passing your MCATs, then spending the next four years of your life getting through classes like clinical epidemiology, neurology and radiology so you could practice medicine? Today's financially driven managed care environments make having a practice difficult. Hurrying patients in and out of the office to make a quota and going into negotiations to prescribe treatments that don't coincide with a patient's policy aren't practicing medicine. We'd like to prescribe a solution: Move your profession to the United States Air Force. Get back to what's important — practicing medicine. To request more information, please visit our website at AIRFORCE.COM or give us a call at 1-800-423-USAF.
